	<ul style="list-style-type: none"> ▪ Electrical Maintenance Technician only – Prior experience working on medium voltage generation, distribution and electrical systems in an industrial setting
<p>Accountabilities and Specific Requirements:</p>	<p>The Technician Trainee and their assigned Supervisor will implement a formal progression program that includes performance objectives and specific developmental goals, all within the established program timeline (which includes milestones and testing for completion). A mentor will be provided to help guide the individual through the program. The technician Trainee will be accountable for the following duties:</p> <ul style="list-style-type: none"> ▪ Complete the developmental plan within the set timeline. ▪ Meet applicable Operator Qualification requirements. ▪ Complete redlines on drawings, procedures and other documents as needed. ▪ Acquire overall system knowledge and how the systems interface with one another. ▪ Operate fire detection, suppression and control systems. ▪ Work in adverse winter weather conditions. ▪ Work with various forms of industrial based software. ▪ Communicate via phone and radio during plant upset and emergency response conditions. ▪ Maintain documentation, such as log books, work orders, preventative maintenance tasks, and calibrations data to ensure compliance with written guidelines, policies and procedures. ▪ Perform energy isolation of equipment and systems for major and minor maintenance. ▪ Demonstrate knowledge and use of the Alyeska work permit system to safely control work processes. ▪ Perform a wide variety of tasks, including snow shoveling and operation of mechanized equipment. ▪ Perform all work in full compliance with the APSC Health, Safety and Environmental protection requirements, including full participation in the behavior based safety system. ▪ Perform assigned tasks in response to emergencies.
<p>Knowledge, Skills, and Abilities:</p>	<ul style="list-style-type: none"> ▪ Ability to read and interpret single and three line drawings, schematics, logic diagrams, P&ID and wiring diagrams ▪ Ability to troubleshoot and repair flow, temperature, level, and pressure instrument loops ▪ Ability to operate or maintain process equipment such as generators, transformers, motors, variable speed drives, motor-operated valves (MOV), berth loading equipment, process equipment (such as ballast water treatment, power generation, etc.) ▪ Skills as needed to maintain dedicated steam boiler power plant and power distribution system. Systems may include boilers, turbines, incinerators, and compressors ▪ Marine and land based oil spill prevention and response
<p>Contributor Level:</p>	<p>Non-Exempt</p>
<p>Pre-Employment Drug Screen Testing:</p>	<ul style="list-style-type: none"> ▪ Alyeska Pipeline Service Company (APSC) requires pre-employment drug testing utilizing hair test collections for all positions. The preferred collection site is from the head (approximately 1/2 inch of hair length necessary). Head hair testing provides an approximate 90 day window of detection that checks for drug use. In addition, for Department of Transportation covered positions, APSC will also utilize urinalysis testing. Any positive drug test makes you ineligible for APSC employment. ▪ It is important to note that APSC does not seek or accept any genetic information as part of the hair testing procedure or any other process that could directly or inadvertently provide genetic information (family medical history).
